

Folly Hill Infant School

GIFTED AND TALENTED CHILDREN POLICY

SEN Suite and curriculum suite

Signed Chair of Governors

Signed Headteacher

Date: Autumn Term 2018

Review Date: Autumn Term 2020

INTRODUCTION

At Folly Hill Infant School, we aim to provide a curriculum that is appropriate to the needs and abilities of all our children. We plan our teaching and learning in such a way that we enable each child to reach for the highest level of personal achievement. This policy helps to ensure that we recognise and support the needs of those children in our school who have been identified as 'gifted' and 'talented' according to national guidelines.

In these guidelines the term 'gifted' refers to a child who has a broad range of achievement at a very high level. Those children who are gifted often have very well-developed learning skills. The term 'talented' refers to a child who excels in one or more specific fields, such as sport or music, but who does not perform at a high level across all areas of learning. In our school, however, we use the terms 'very able' and 'more able' for children who, at a national level, are referred to as 'gifted' and 'talented'.

We respect the right of all children in our school, irrespective of differences in ability, to access a number of areas of learning, and to develop the knowledge, skills, understanding and attitudes that are necessary for their self-fulfilment and eventual development into active and responsible adults.

The mission statement of our school talks of valuing the individuality of all our children. The aims of our school make specific reference to teaching and learning that takes into account the needs of all children. They also identify the commitment to giving all our children every opportunity to achieve the highest of standards. This policy guides the way in which this happens for our more able and very able children.

For the purposes of clarity- children with gifts and talents are identified as achieving exceeding at EYFS and level 2a/3 in Year 1.

Gifted and talented children are identified through the school's SEN register.

AIMS AND OBJECTIVES

Through this policy we aim to:

- ensure that we recognise and support the needs of our children;
- enable children to develop to their full potential
- offer children opportunities to generate their own learning;
- ensure that we challenge and extend the children through the work that we set them;
- encourage children to think and work independently.
- Update our understanding of learning for more able pupils to ensure our good practice continues to move forward

IDENTIFICATION OF MORE ABLE AND VERY ABLE CHILDREN

We use a range of strategies to identify more able and very able children. The identification process is ongoing and begins when the child joins our school. Each child's pre-school record gives details of their achievements and interests in particular areas. Discussions with parents and carers enable us to add further details to these records.

Children are observed and receive points as part of the Early Years Foundation Stage using the Development Matters document. This gives information about their developing skills and aptitudes across several areas of learning. We discuss each child's progress with the parent and use this information when planning for individual needs. A child who is exceeding in any one area could be considered more able.

As children progress through the school, we assess them regularly to ensure that they are making the sort of progress that we are expecting of them in their personal targets. We identify them as more able and very able children when they achieve high levels of attainment across the curriculum, or in particular skills or aspects of subjects. The children are tracked to ensure they are on target.

The children receive a teacher assessment level in Year 2. Staff also make regular assessments of each child's progress in all subjects of the National Curriculum. We compare the information from these assessments with Surrey Standards and the Raise online, in order to ensure that each child is making appropriate progress.

Staff regularly review the children's progress and discuss the progress made with parents at the termly parent evenings, and report annually on each child's progress in July.

Identified pupils learn with their class teacher in timetabled gifted and talented sessions.

APTITUDES IN ENGLISH AND MATHEMATICS

More able and very able children in English are identified when they:

- demonstrate high levels of fluency and originality in their conversation;
- use research skills effectively to synthesise information;
- enjoy reading and respond to a range of texts at an advanced level;
- use a wide vocabulary and enjoy working with words;
- see issues from a range of perspectives;
- possess a creative and productive mind and use advanced skills when engaged in discussion.

More able and very able children in mathematics are identified when they:

- explore a range of strategies for solving a problem;
- are naturally curious when working with numbers and investigating problems;
- see solutions quickly without needing to try a range of options;
- look beyond the question in order to hypothesise and explain;
- work flexibly and establish their own strategies;
- enjoy manipulating numbers in a variety of ways.

LEARNING AND TEACHING STYLE

Teachers in our school plan carefully to meet the learning needs of all our children. We give all children the opportunity to show what they know, understand and can do, and we achieve this in a variety of ways when planning for children's learning by providing:

- a common activity that allows the children to respond at their own level;
- an enrichment activity that broadens a child's learning in a particular skill or knowledge area;
- an individual activity within a common theme that reflects a greater depth of understanding and higher level of attainment;
- the opportunity for children to progress through their work at their own rate of learning;
- locally run master classes.

Children meet a variety of organisational strategies as they move through the school. Each strategy supports all children in their learning but gives due regard to the more able and very able learner.

We currently set targets for Literacy and Numeracy. We teach the children in ability groups. Teachers regularly review the progress of children, and children move between the groups as appropriate. This enables teachers to plan work that reflects the narrow band of ability in each group.

Learning is also enriched through occasional homework activities linked to the work being undertaken in classes. This offers teachers a further opportunity to set work at the level of individual children.

The children will also have the opportunity to experience a range of educational visits that further enrich and develop learning.

MANAGEMENT STRATEGIES

The Headteacher co-ordinates the provision and practice within the school for more able and very able children. The co-ordinator's role includes:

- ensuring that the more able and very able register is up to date; this is part of our SEN register
- monitoring teachers' planning to ensure that suitable tasks and activities are being undertaken by more able and very able across all curriculum areas;
- regularly reviewing the teaching arrangements for more able and very able children;
- monitoring the progress of more able and very able children through termly discussions with teachers;
- supporting staff in the identification of more able and very able children;
- providing advice and support to staff on teaching and learning strategies for more able and very able children;
- Liaising with parents, governors and LA officers on issues related to more able and very able children.

The co-ordinator for our policy on more able and very able children monitors this policy on a regular basis and gives feedback to the governing body. The monitoring includes feedback from parents and children, as well as regular classroom observations of teaching and learning, and termly evaluations of children's written work.

The co-ordinator collects samples of work from more able and very able children, in order to demonstrate the standards that they are achieving. We use these examples to inform the process of identification of more able and very able children.
